A0001e- Security Architecture Compulsory homework no.1

Esa Kesti
Cork, Ireland

I have a BA in Business Information Technology from Kemi-Tornio University of Applied Sciences.
My experience in Computer Science comes from natural interest and work experience. I am currently working for Apple Inc. as an ACE Platform Engineer, my work includes solving complex issues, root cause analysis, scripting etc. I am working fulltime.

My expectation from this course is to gain more knowledge on the security architecture.

I am using a 2017 27" iMac with i7 Processor and 32GB RAM. I am running several Operating Systems on virtual machines e.g. Ubuntu, Windows 10. I have 240mb network connection in my house.

I am planning to work mostly by myself due to the time difference and my busy schedule at work. I am open for suggestions for team work.
